---

## Technical Skills

Javascript, React, NodeJS, Angular 1, CSS, HTML, A-Frame (Three.js), jQuery

SQL Databases, NoSQL Databases, Webpack, AWS, Git, TDD, Agile

---

## Projects

**Immerse** - Software Engineer/Scrum Master             **github.com/francoabaroa/escape-reality**
*Virtual reality Instagram*

- Built photo sharing VR app using A-Frame React to allow users to immerse themselves into their friends' photos
- Implemented 360-degree photo upload functionality using buffers and AWS S3 buckets in order to render the photos immediately
- Integrated voice recognition using annyang's API to allow users to leave hands-free comments

**Markable** - Software Engineer             **github.com/francoabaroa/markable**
*A Chrome extension app that allows users to share webpage markups with friends by injecting highlights in the DOM*

- Leveraged the Medium Editor and Google Chrome Extension API's to let users markup any website and share it with their circle of friends in a fun and new way
- Built extension page with Angular and dashboard page with React and synchronized authentication between them and the NodeJS server to deliver a consistent user experience

**HackerWords** - Software Engineer             **github.com/francoabaroa/hackerwords**
*A boggle-like game app for finding words in a N x N matrix*

- Developed REST API endpoints that facilitate multiplayer mode to allow two users to play the same game board and compete for the highest score
- Built back-end server using Express in order to deliver a scrambled board to users and help keep track of the game state
- Designed game UI using React and React Router to deliver a fast, smooth and beautiful user experience

**Goolp** - Lead Software Engineer             **github.com/francoabaroa/goolp**
*A restaurant review app that combines the power of Google and Yelp*

- Utilized the Google Places and Yelp API's in order to display a new, aggregated rating to users
- Constructed front-end using Angular 1 in order to leverage two-way data binding and render the reviews instantly to the users
- Engineered REST API endpoints using Express to allow users to search for any restaurant in the world and see the Goolp rating

---

## Professional Experience

**Mixpanel** - Sales Development - *San Francisco, California*             **2015-2016**

- Prospected executives at Fortune 500 companies and booked appointments that added over $150k to the pipeline

**Morgan Stanley** - Wealth Management - *Chicago, Illinois*             **2015**
the
- Generated hundreds of leads by cold calling and qualifying prospects daily
